"Jewelry from handmade paper as easy as the touch of a butterfly"

My chains, bracelets and rings look like boxes or have the form of cocoons. I produce them in an environmentally friendly way with natural materials. I make the paper for the jewelry from recycled fibres and color it with mineral pigments. I embellished the light pieces of jewelry with fresh water cultured pearls. For me, it is satisfying to make something with my own hands, and as I do so, new ideas emerge and take on a physical presence.
